Jose Andres Auyon Cobar

Software Engineer

(+502) 4781-8492 | auyon.joseandres@gmail.com | LinkedIn | GitHub | Portfolio

Profile

Software Engineer with experience across enterprise software, full-stack product development, and AI-enabled solutions. I have worked on production systems, client-facing platforms, APIs, CI/CD workflows, cloud deployments, and internal tooling across web and backend environments. Strong hands-on background with React, TypeScript, Node.js, Python, Java, AWS, Docker, and SQL/NoSQL databases. Currently working at HTEC supporting enterprise client initiatives while continuing to build freelance full-stack and AI-driven products.

Technical Skills

Languages: Python, JavaScript, TypeScript, Java, PHP, SQL, Golang
Frameworks: React, Next.js, Node.js, Express.js, Flask, FastAPI, React Native, Laravel, Vue.js, GraphQL
Cloud / DevOps: AWS, Azure, Docker, Kubernetes, Nginx, GitHub Actions, GitLab CI/CD, Firebase
Databases: PostgreSQL, MySQL, MongoDB, Oracle, Supabase, Neo4j
AI / Data: OpenAI API, Gemini, RAG, vector databases, prompt engineering, Pandas, scikit-learn, PyTorch basics
Tools / Practices: Git, Postman, Jest, Mocha, JUnit, Jira, Agile/Scrum, REST APIs, microservices, TDD

Experience

Software Engineer - HTEC Group Sep. 2025 – Present

- Contribute to production systems and delivery workflows for enterprise client initiatives, working across application maintenance, feature delivery, troubleshooting, release support, and cross-team collaboration.
- Operate across frontend, backend, infrastructure, and deployment concerns, helping move work from development through staging and production with a strong focus on reliability and execution.

NovoPayment *(PHP/CodeIgniter, JavaScript, AWS, CI/CD)*

- Fixed critical customer-facing validation and input-handling issues, closing high-priority defects and improving platform reliability in production.
- Resolved multi-tenant registration and onboarding defects, improving successful registrations and reducing support friction.
- Coordinated releases with backend and infrastructure teams and improved promotion workflows across environments.

FocalPoints *(React, Tailwind, FastAPI, PostgreSQL, Docker, Railway/Vercel)*

- Contributed to technical analysis and phased delivery planning for the MVP, identifying scope, dependencies, and implementation risks.
- Built full-stack functionality across frontend, APIs, authentication, roles, and document-management workflows.
- Helped define deployment environments, CI/CD practices, observability basics, and release-readiness standards.

Technical Discovery / Crypto Wallet Project *(Architecture, security, estimation)*

- Conducted technical research and architecture analysis for a wallet solution, evaluating build-versus-buy options and security considerations.
- Produced estimates, scope breakdowns, and risk assessments for multiple delivery scenarios.

RedBud Advisors *(WordPress, Elementor, PHP, Nginx, deployments)*

- Led technical execution and delivery of a responsive website project from scope definition through deployment.
- Managed deployment, domain, DNS, migration, and operational continuity tasks to support a stable release.

Software Developer - Pixel Productions Jun. 2025 – Sep. 2025

- Automated Shopify inventory workflows for bulk product and stock management, reducing manual update time.
- Implemented storefront UI changes using Liquid, CSS, and JavaScript to improve usability and presentation.
- Built features for internal systems using Next.js, Firebase, and Laravel-based APIs, improving data handling and administrative workflows.
- Structured API responses and event data to be consumable by future AI/LLM-based reporting and classification flows.

Freelance Full Stack Developer Apr. 2024 – Present

- Build custom full-stack web and mobile solutions for clients, with experience spanning AI integrations, SaaS platforms, internal tools, and operational systems.
- **Alina (Legal AI SaaS):** Developed frontend and backend with Vanilla JavaScript and Flask; integrated with a private AI provider to automate legal document processing and reduce manual review workload.

- **Aquacorp:** Built backend services with Express.js and REST APIs for water-resource monitoring and structured environmental data workflows.
- **Educational Game Service:** Built a platform with React Native, Golang, and MongoDB with authentication and mission tracking for students learning math skills.
- **Retail Store CRM/ERP:** Developed a PHP and MySQL solution for sales, inventory, and customer management, improving operational visibility and day-to-day data accuracy.

Full Stack Developer - Korean-Guatemalan Chamber of Commerce Nov. 2023 – Mar. 2024

- Built and optimized web applications using React, Tailwind CSS, Node.js, Express.js, and MongoDB.
- Developed RESTful APIs and contributed to architectural and UI/UX decisions that improved scalability, usability, and maintainability.
- Mentored junior developers and supported platform growth for chamber registration and business-management processes.

Software Developer - Granja El Ceibillal Mar. 2023 – Nov. 2023

- Built software to support poultry farm operations, real-time monitoring, and data management, helping reduce operational losses.
- Developed application components with React Native and Flask and supported AWS-hosted data infrastructure.
- Improved database design, system modularity, and deployment workflows through architecture and CI/CD contributions.

Computer Science Tutor - Universidad del Valle de Guatemala Jan. 2021 – Present

- Tutor students in programming, algorithms, problem solving, and core computer science concepts through one-on-one guidance and practical examples.
- Break down technical topics into clear step-by-step explanations, strengthening student understanding and debugging skills.

Education

Universidad del Valle de Guatemala Expected 2026
Bachelor's in Computer Science and Information Technology Engineering

Colegio Decroly Americano 2020
High School Diploma in Science and Humanities

Selected Certifications

- Java Backend (Spring Boot) Developer Certification - Ada School / Swisscontact
- Back-end Developer Professional Certificate - Boot.dev
- Software Engineer Certificate - HackerRank
- SQL (Advanced) Certificate - HackerRank
- ChatGPT Prompt Engineering for Developers - DataCamp
- Build an AI Agent in Python - Boot.dev

Languages

Spanish: Native **English:** C2 **Japanese:** Elementary
